China, Denmark (HQ), Poland & the US
Innovative solutions that...

Seal
Absorb
Protect
Some of our business partners
Individual and standard solutions in foam, rubber and plastics

- Gaskets & Seals
- Sound absorbers
- Vibration dampers
- Gap fillers
- Insulations
- Sealant profiles
- Extruded rubber profiles
- Adhesives
A strong and global supplier to the wind turbine industry

- Extensive knowledge and experience
- Long-standing business relationship
- Strong system solutions that improve functions and applications in the wind turbine industry
DAFA Tower Foundation System
- For concrete molding processes

• Recessing in the foundation saves time and effort
• Customised solution
• Quick and efficient mounting
• Consistent molding
• Minimum waste of high density concrete
DAFA CargoPro®
- Safe transportation and storage of the blades

• Safe universal protection
• Fewer repairs
• Bright signal colours
• Easy mounting and handling
• Long service life and durability
Nacelle solutions
- DAFA RotaSeal® optimises the uptime and increases productivity

- Oil resistant
- Low friction and abrasion
- Stainless steel insert
- Fast and efficient mounting
Nacelle solutions
- DAFA Sound damping

- Reducing the reflection of airborne sound
- Insulation and screening of sound
- Preventing transfer of vibrations
The benefits for you?

- Global supply chain
- Worldwide sales and support
- 4 production sites
- Strong R&D division
- Highest quality standards
- Wide material range
- Latest technology
- Stable, family-held ownership

= superior partnership
