KINUA GROUP EXPERTS IN HEAVY CARGO HANDLING SOLUTIONS

KIMUA GROUP

Experts in the design and manufacturing of heavy handling solutions.

Offshore Wind has always been an important driver for our own progress.

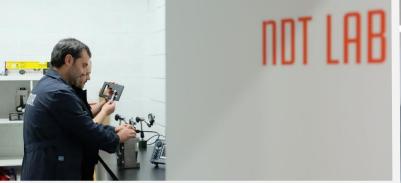

Tailor-Made Solutions

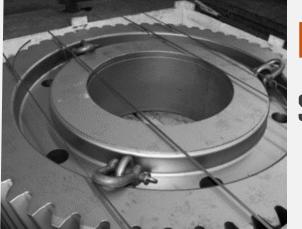

A great TEAM!

Quality solutions that provide great safety and with the lowest possible environmental impact, created from the experience of a great team and with the most advanced technology.

KIMUA services

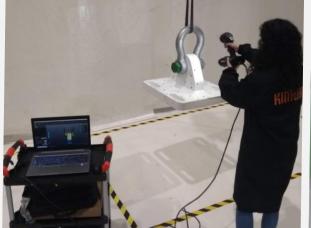

A global company that takes full care of all the handling needs of big components of an offshore wind turbine, all in one!

The benefits of EC△-DESIGN

HIGHER QUALITY PRODUCTS

Eco-design products are more versatile and are manufactured with longer-lasting materials.

MORE EFFICIENT PRODUCTION

They save energy and require fewer natural resources and raw materials.

FEWER EMISSIONS

They consume less energy during transport for lower CO₂ emissions.

MORE SUSTAINABLE INDUSTRIES

Companies benefit from **innovation** and become more committed to the environment.

HAPPIER CONSUMERS

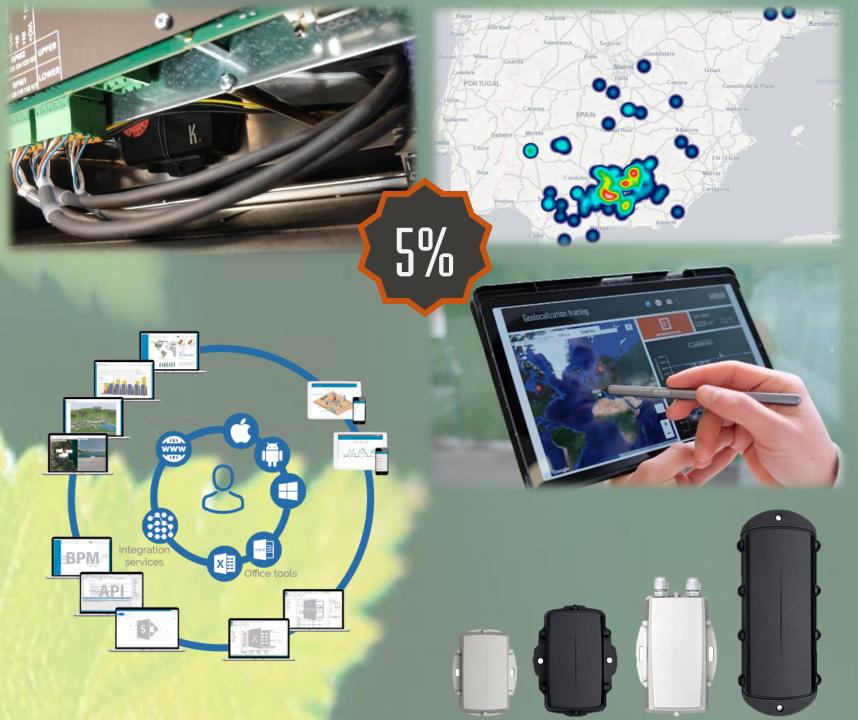

Consumers' needs are met with more attractive products that satisfy an increasingly demanding public.

MARKET DIFFERENTIATION

Sustainable products have added value hat gives them an edge over competitors.

FAGUS SERVICE

The ultimate in data collector systems.

Gather information to make more objective decisions.

Optimize your work, reduce costs, control environmental impact... All through the FAGUS service.

K.

Live Streaming Load Tests

LAMIA is our modular, portable and monitored test bench.
Live load the tests from home and reduce the carbon footprint of these types of operations.

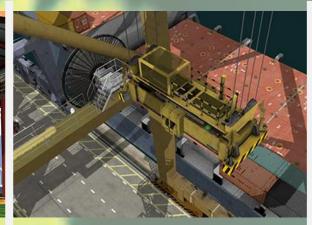

Personalized TRAINING

We analyze the operations in your company and design a fully customized training, we create the virtual reality of the design and train people through a balanced formula of theoretical classes, virtual reality practices and real practices.
